Patent No. US20020110559A1

GENERAL INFORMATION:

APPLICANT: Wands, Jack R.

APPLICANT: Wands, Jack R.

APPLICANT: Deluch, Alan H.

APPLICANT: Deluch, Hosein A.

TITLE OF INVENTION INGRES: 21486-032 CIP

CURRENT APPLICATION NUMBER: US/09/859,604

CURRENT APPLICATION NUMBER: US/09/859,604

CURRENT FILING DATE: 1209-11-08

NUMBER OF SEQ ID NOS: 13

SOFTWARE: Patentin Ver. 2.1

SEQ ID NO 1

LENGTH: 36

TYPE: RT.
                                                                                                                                                                                                                                                                                                                                                                                                                                                             Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           FEATURE:
OTHER INFORMATION: Description of Artificial Sequence: Consensus

Sequence 1, Application US/0903023
; Sequence 1, Application US/0903023
; Patent No. US20020146421A1
; GADERAL INFORMATION:
APPLICANT: Wands, Jack R.
APPLICANT: Galson, Rolf I.
TITLE OF INVENTION: DIAGNOSIS AND TREATMENT OF MALIGNANT NEOPLASMS
TITLE OF INVENTION: DIAGNOSIS AND TREATMENT OF MALIGNANT NEOPLASMS
TITLE OF INVENTION: DIAGNOSIS AND TREATMENT OF MALIGNANT NEOPLASMS
CURRENT APPLICATION NUMBER: 032 DIV1
CURRENT FILING DATE: 2001-10-11
PRIOR APPLICATION NUMBER: 09/436,184
PRIOR APPLICATION NUMBER: 09/436,184
PRIOR SEQ ID NOS: 9
SOFTWARE: Patentin Ver. 2.1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Gaps

Sequence 93, Application US/10231778

Publication No. U620030126647A1

GENERAL INFORMATION:
APPLICANT: Bilodeau, Pierre
APPLICANT: Bilodeau, Pierre
APPLICANT: Bilodeau, Pierre
APPLICANT: Chaudhury, Abdul M.
APPLICANT: Channay, Anna M.G.
APPLICANT: Luo, Ming anna M.G.
APPLICANT: Koltunow, Anna M.G.
APPLICANT: Eascock, William M.G.
APPLICANT: William M.G.
APPLICANT: Walliam W.G.
APPLICANT: Peacock, William W.G.
APPLICANT: Peacock, William W.G.
APPLICANT: Worker of the FIS2 gene
TITLE OF INVENTION: Method for inducing seed development by down-regulating
TITLE OF INVENTION: Method for inducing seed development by GURENT APPLICANTON WHBER: US/10/231,778

CURRENT APPLICANTON NUMBER: 00/101,184

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ઠે
                                                                                                                                                                                                                                                                  US-10-21-7/W-11-1/W-10-10-8

Sequence 108, Application US/10231778

Publication No. US20030126647A1

GENERAL INPORMATION:

APPLICANT: Bilodeau, Fierre

APPLICANT: Chaudhury, Abdul M.

APPLICANT: Chowney, Mana M.G.

APPLICANT: Rolling M. Chaude Gor inducing seed development by down-regulating TILLE OF INVENTION: expression of the FIS2 gene

TITLE OF INVENTION: expression of the FIS2 gene

TITLE OF INVENTION: expression of the FIS2 gene

TITLE OF INVENTION: expression of the FIS2 gene
